

INTERACTIVE MAP¹ GUIDE

Explore & View your *S^knowledge*

Map Functionality

Below is an overview of the different map functionality that is available to explore!

HOME

Click here to return your map extent to the default map view.

ABOUT

Access information about the project, helpful links, and data acknowledgements.

DATA LAYERS

Toggle layers on by clicking the checkbox. Note: Not all layers are visible at all scales. If you don't see the data you're looking for, zoom in/out and check the Time Slider to make sure you're viewing a time period that contains data.

TIME SLIDER

This enables you to view data from specific time periods. Once you click on this icon, a timeline will appear. Use the arrows to select your time period of choice.

ATTRIBUTE TABLE

This will allow you to view tabular data for all data points within the map view.

FULL-SCREEN VIEW

When you click this icon, it will expand the mapping application to full-screen. This is on by default for mobile devices.

ZOOM

Use these buttons or your mouse scroll to zoom in and/or zoom out on the map.

FIND MY LOCATION

If you are on a device that has location-services enabled, when you click this button it will zoom to your device location.

SCALE BAR

As you zoom in and/or out, the scale bar will adjust to reflect the scale for the current map view.

OVERVIEW

This will show your map extent as a box relative to your location a world map.
